DETAILED ACTION

Claims 1-3 are pending and subject to restriction.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a method for supplying oxygen to a biological entity, classified in class 435, subclass 1.1, for example.
- II. Claims 2 and 3, drawn to an apparatus for supplying oxygen to a biological entity, classified in class 607, subclass 3 or class 435, subclass 284.1 for example.

The inventions are distinct, each from the other because of the following reasons:

The apparatus of claims 2 or 3 is not required in the practice of the method of Group I AS CLAIMED. Thus, the several inventions listed above are independent and distinct from one another as they have acquired a separate status in the art and require independent searches, particularly with regard to the literature searches. Clearly, a reference which would anticipate one of the above groups would not necessarily anticipate or even make obvious any of the others.

Because these inventions are distinct for the reasons given above restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1651. The supervisor for 1651 is M. Wityshyn, (703) 308-4743. The normal work schedule for Examiner Saucier is 8:30AM to 6:00PM Tuesday-Friday and every other Monday.
